Attention: Mr. Tim White/TF6
Contract: NAS9-13280
Subject: Third Monthly Report for Period 1 May 1973
through 31 May 1973

Dear Sir:

The following report serves as the third monthly report for this contract which is entitled "Developing Processing Techniques for Skylab Data". The financial report is being submitted under separate cover.

The purpose of this investigation is to test information extraction techniques for SKYLAB S-192 data, and compare with results obtained in applying these techniques to ERTS and aircraft scanner data.

Current effort under this contract is limited to preliminary planning of the program to accomodate possible changes in the test site and data collection schedules resulting from problems with Skylab operation. We are still awaiting word concerning the format of the S-192 CCT format and will begin programming the data conversion module as soon as the format is identified.
